The company plans to propose an increased dividend distribution of € 1.50 per share (previous year: € 1.20) to the Annual General Meeting from the retained earnings of € 121.71 million.

The company's equity, including the fund for general banking risks, amounts to around € 241 million.

The 2025 financial year was characterised by consistently higher sales and significant investments in existing and new business areas.

The number of transactions executed by the company as a Market Specialist on the Tradegate Exchange (since 1 January 2026 Tradegate BSX) rose by 48.7 % to 73.28 million; the associated trading volume increased by 44.5 % to € 471.48 billion. This represents a new record turnover in the company's history and exceeds the previous record year of 2021 by 24.8 %.

The start to the new financial year has been very good. In January, a new turnover record was set on a monthly basis with € 54.8 billion, an increase of over 50 % compared to the previous year. In February, turnover amounted to € 44.33 billion, which corresponds to a 13.11 % increase in turnover compared to the previous year. In the first trading days of March, extremely high sales were recorded due to the war in Iran. However, forecasts for the year as a whole cannot be derived from this, as very high sales were already achieved in the following months of the previous year.

The annual financial statements will be published by the company after approval by the Supervisory Board at the end of March.
